

## AMPS Online Course Overview

---

### Course purpose

The aim of this course is to train you to administer the AMPS in a reliable and valid manner and successfully complete your AMPS certification.

### Materials needed

You will need easy access to the following materials during **every** module of the course:

- AMPS Manual, Volumes 1 and 2 (included in the course cost)
- Highlighter
- Pen or pencil
- Sticky notes or page markers to denote specific sections of manual
- Blank paper for note-taking
- AMPS Score Forms (free to download)

### Course format

This certification course consists of an online portion and the rater calibration process. During the online portion, you will be asked to complete readings in preparation for viewing video lessons. During several of the video lessons, you will need to use your AMPS manual to score video cases and submit your scores online for feedback. You will receive immediate, detailed, and individualized feedback and suggestions to help you improve your scoring.

When you are finished with the online portion, you will begin the AMPS rater calibration process. To do this, you will administer the AMPS to 10 people and then submit your scores for analysis. You will again get detailed, individualized feedback within 1-2 weeks of submitting your data. You become a certified AMPS rater once you have shown you score the AMPS in a reliable and valid manner. Once you are a certified AMPS rater, you are able to generate an unlimited number of computer-generated reports for the people that you test using the AMPS.

During the online portion of the course, we will provide you with explicit instructions and helpful hints on how to successfully complete the rater calibration process. You also will continue to have access to the online portion of the course during the rater calibration process. You may wish to return to online learning modules and resources as you complete the rater calibration process.

***Please note, the video lessons do not replace careful reading of the AMPS manual.***

### Course length and contact hours

This AMPS certification course consists of online lessons, testing 10 people using the AMPS after the online portion of the course, and submitting data needed to complete the rater calibration process. You have 3 months from the date you first sign in to your AMPS online course to complete the online lessons, test 10 people, and submit your data for analysis.

You will earn 45 contact hours for this course.

### Support

If you have questions during any portion of this course, you have access to a Frequently Asked Questions webpage and an integrated messaging system so that you can ask questions of the AMPS faculty. General or technical questions can be sent to [info@innovativeotsolutions.com](mailto:info@innovativeotsolutions.com).

Our support team typically responds within 24 hours during business days. Please note that the Center for Innovative OT Solutions is based in the United States and is open from 8:00am–4:00pm, Mountain Time (UTC/GMT -7 hours).

### Learning module information and required readings

For your planning purposes, we provide a list of estimated completion times for each section of the course in the table on the next page. Additionally, we list the required readings that accompany the learning module or lesson.

**Before** each learning module, be sure you have completed the required reading in the list below. ***Careful reading of the AMPS manual is essential to your success.***

## Course Outline

Module	Title	Time	Required Reading (in advance)
<b>Module 1</b>	<b>Introduction to the AMPS</b>	7 minutes	
<b>Module 2</b>	<b>Introduction to AMPS Administration</b>	5 minutes	<ul style="list-style-type: none"> <li>• <b>Volume 1:</b> Read Chapters 1, 2 and 3</li> </ul>
<b>Module 3*</b>	<b>Scoring the AMPS Items</b>	6.5 hours total for Module 3 (includes all lessons below)	<ul style="list-style-type: none"> <li>• <b>Volume 1:</b> Read Chapter 8</li> <li>• <b>Volume 1:</b> Review Section 2.6</li> <li>• <b>Volume 2:</b> Become familiar with the organization of this manual</li> </ul>
<i>Lesson 3.1A</i>	<i>Introduction to Scoring</i>	12 minutes
